MIXING BOARD

P/N: 39760 (SAP No. 300006650)

Product overview:

The board makes it easy to mix a putty with a hardener. The board carries a 50-sheet block of non-soaking chalk overlay paper. Each sheet in the block is adhesively bonded along three edges and held firmly to the base to prevent shifting under the putty knife. Product helps to save the time needed to clean the board of the material and to keep the workshop clean.

Characteristics:

- High-quality, non-soaking paper sheets prevent putty from soaking through.
- The adhesive along three edges keeps every sheet firmly to its base to prevent shifting under the putty knife.
- The convenient grip helps with holding the board with one hand only.

Technical data:

	Value
Board base material:	Solid cardboard, thickness: 3 mm
Sheet material:	Glossy chalk overlay paper, 150 g/m ²
Board base size:	360 x 270 mm
Sheet size:	270 x 270 mm
Sheets per base:	50 sheets bonded along three edges

Shelf life; storage and application requirements:

The product will perform best for 2 years from the production date if stored dry. Protect from freezing and moisture.

Note:

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We cannot be held liable for defects where the final results were affected by factors beyond our control. NOVOL reserves the right to improve the product and modify the technical requirements, which may entail modification of the specification. This product is not hazardous if used as intended.
