PLASTIC SPREADER

P/N: 39715 (300005090)

Product overview:

The plastic spreader is intended for stirring, mixing, application and pre-sculpting of putties. The tool is flexible to facilitate the use on the curved surfaces. The tool helps with thorough mixing of putties with hardeners and easy application on the repaired workpiece. The product is plastic which reduces the risk of scratching the surface.

Characteristics:

- Flexible and elastic;
- Reduces the risk of scratching surfaces;
- Flat grip;
- For processing of flat and curved surfaces;
- Convenient to use.

Technical data:

	Value
Colour:	red
Size:	120 x 90 mm
Quantity in bulk packaging:	Set of 10 pcs.

Shelf life; storage and application requirements:

The product will perform best for 2 years from the production date if stored dry between 5°C and 40°C.

Notice:

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We may not be held liable for defects if the final results were affected by factors beyond our control. NOVOL reserves the right to improve the product and modify the technical requirements, which may entail modification of the specification. This product is not hazardous if used as intended.
