STANDARD PROTECTIVE FILM 4 x 5 m

P/N: 39397 (300002600)

Product overview:

HDPE protective film in 4 x 5 m sheets for masking and protection of surfaces against overspray, dust, and moisture. The product is intended for processing with waterborne and solvent-based coating products.

Characteristics:

- Helps to mask and protect car body parts against overspray and other contaminants;
- Resists spray booth temperature;
- Universal use, including industrial, construction, and DIY applications;
- Can be applied by single user.

Technical data:

	Value
Material:	HDPE (high-density polyethylene)
Density:	0.95–0.97 g/cm ³ (DIN-EN 1183)
Film thickness:	5 µm
Packaging format:	Single-unit plastic bag
Quantity in bulk packaging:	40 pcs.
Size:	4 x 5 m

Shelf life; storage and application requirements:

The protective film sheet will perform best for 24 months from the production date. Keep at a temperature between 10°C and 30°C. Protect against freezing and UV light. Apply on dry car body panels; if left on a wet surface for a long time, may cause stains on the car body due to water evaporation.

Notice:

The effectiveness of our systems results from laboratory research and many years of experience. The data contained herein meets the current knowledge about our products and their application potential. We ensure high quality, provided the user follows the instructions and the work is performed in accordance with good workmanship. It is necessary to perform a test application of the product due to its potentially different reaction with different materials. We may not be held liable for defects if the final results were affected by factors beyond our control. NOVOL reserves the right to improve the product and modify the technical requirements, which may entail modification of the specification. This product is not hazardous if used as intended.
