## CAR REFINISH SYSTEM

**IMPACT** - it is a new line in range of NOVOL products - one of the leading manufacturer of car-refinish products in Europe. The line consists of: Polyester Putty, Acrylic Primer and Clearcoat, which were designed for end-users who work in the conditions of high temperature and humidity.

The IMPACT products are user friendly, also characterized by premium quality and high standard developed by NOVOL Company based on more than 30 years of experience on the different markets.

# IMPACT

## CAR REFINISH SYSTEM

### IMPACT putty

IMPACT Putty is suitable for a very wide range of use. Application in high temperature: 25-40°C is the main advantage. Applied in thick layers provides excellent filling of large cavities. Soft surface, suitable both for manual and machine sanding is another advantage.

### IMPACT acrylic primer

IMPACT Acrylic Primer thanks to applying high quality resins and special additives provides good anti-corrosion protection and insulation between polyester materials (putties) and acrylic paints. Primer has very good adhesion to various substrates, such as polyester putties, epoxy primers, steel, aluminium. It is suitable for application in conditions of high temperature and humidity.

### IMPACT acrylic clearcoat

IMPACT Acrylic Clearcoat is characterized by very easy application, good flow and fast drying time. High hardness, UV stability and weather resistance guarantee excellent appearance and durability. It is designed for the application process in conditions of high temperature and humidity.
